

Meeting Agenda

Group: OOPP-Group77

Date: 16/9

Chair: Elin

Participants: Alexey, Martin, David, Hampus, Elin

Objectives (5 min)

- Questions to Aline this afternoon
- Discuss seminar and domain model
- What should we do next
- Decide app name

Reports (15 min) from previous meeting

What we have done since last meeting:

Hampus: UML sketching.

Martin: UML sketching.

David: Reflected about how to solve the storage issue in the design model.

Alexey: Made the slides for the seminar and acted as spokesperson for the group during the seminar.

Elin: UML sketching, more specifically how to solve the storage-part of the design model.

Discussion items (35 min)

- App name

MailMe was suggested by Hampus. The group did not object :), so that will be the app name.

- Domain model

The group received some critique during the seminar regarding the domain model. We need to rethink our domain model and make it more clearly connected to the user stories. We made a few changes and will ask Aline for further advice.

- What we should do next
 - Continue to improve the design model. Make connections from model to view and controller more specific.
 - Make sequence diagrams and “torrköra” the application (primarily the model-part).
 - Improve the domain model.
 - Continue to document the project in RAD and SDD, primarily update class responsibilities.

- What to ask Aline this afternoon:
 - Design model. Is it ok?
 - Domain model. Ok? How to make it better?
 - Ask whether our user stories are okay and make sure that we are on the right track.
 - About the UML:
 - * should we include all dependencies (usage, etc)?
 - About the RAD:
 - * should we write class responsibilities for all classes and interfaces in the design model?

Outcomes and assignments (5 min)

See discussion items for what was decided regarding those.

- (re)Assign to each group member which issues to solve.
 - No specific assignment will be given until the group has finalized the design model etc together.
 - (But Hampus will upload this protocol to the repo :))
 - (Elin will get a room for the next meeting)

Wrap up

Next meeting will take place Tuesday 21/9 at 08:00, in room M1215B at Chalmers.
