

Meeting Agenda

Group: OOPP-Group77

Date: 2021-10-07

Chair: Alexey

Participants: Alexey, Elin, Martin, David, Hampus

Objectives (5 min)

- Discuss the status of the project prior to peer review-hand-in and what to do. Create a checklist.
- Discuss what to do after peer review-hand-in. (next iteration)

Reports (15 min) from previous meeting

Alexey: Updated SDD and RAD. Worked on fixing bugs in the send mail and writing controller.

Elin: Worked on SDD. Fixed AddAccountView and controller, fixed StartPageView and Controller and adapted them to new system architecture. Added default css file that has the to make it easier to change style over whole application.

Martin: SDD: system architecture, javadoc and variable naming, fixed add-account bug, fixed comboBox-account-bug, fixed persistent-email-and-folder-focus-bug, created a javafx dependency free observable structure idea.

David: Worked on the GUI, fixed bug in add account. Worked on SDD and RAD.

Hampus: Thorough update of RAD. Debugged the application due to migration to a new branch. Updated design model and continued on filtering-package.

Discussion items (35 min)

- Discuss the status of the project prior to peer review-hand-in and what to do. Create a checklist.
- Discuss what to do after peer review-hand-in. (next iteration)

Outcomes and assignments (5 min)

- Outcomes

Todo before peer review-hand-in:

- update comments and javadoc
- update exceptions and exception handling
- go over everything and check so everything is in the right place after migration
- READ-ME, add all meeting protocols to new branch

- Look through SDD and RAD before hand in

- (re)Assign to each group member which issues to solve.

Before peer review:

Alexey: Make PMD and JDepend work, updated RAD and SDD, updated code with comments.

Elin: Update SDD introduction, go through the code and add comments/javadoc.

Martin: Update code with comments and javadoc, update readme.

David: Add missing definitions in SDD.

Hampus: Update code with comments and javadoc, import missing files to new design branch.

Next, after peer review-hand-in:

Alexey: HTML reading view, and visual indicator of file attached (for both reading and writing), spinning bar show that is trying to send. Loading bar state.

Elin: work on ideas of how to split Model into Model and Control.

Martin: Fix alerts and account comboBox, implement observer pattern.

David: Move emails to trash or archive. Fix the recipient's bug.

Hampus: Complete the TextFinder-package and possibly implement front-end for filtering and sorting.

Wrap up

Next meeting Tuesday 12/10 kl 8-12: M1205
